

## WP3 THEMATIC WORKING GROUPS

### TWG 8 : MARINE SCIENCES AND TECHNOLOGIES

**Focus on Marine Sciences :  
Road map, Inter-regional platform, Networking**

**Ricardo J. Haroun Tabraue  
(ECOQUA-ULPGC, Spain)  
Coordinator of TWG8 :  
Marine Sciences and  
Technologies**

**Ambition : experts of Outermost Regions build  
tools for long term cooperation**

### IMPLEMENTATION OF RELEVANT TOOLS

- 1 Create a list of key institutions at OR and EU level in the area of Marine Science and Technologies.
- 2 Identify External Networking Events of interest organised at regional, national or at EU level, promoting among the members their active participation
- 3 Promote TWG Networking Activities by organising webinars to present a selection of successful projects in which TWG8 members have taken part

### INCREASE ORS INTEGRATION INTO THE EUROPEAN RESEARCH AREA

Identify :

- **Calls** and topics of interest for the TWG8 on Horizon Europe Programme, LIFE, DGs, etc.
- **Active partners** looking for leading a consortium or to join one in forthcoming calls and funding opportunities.

- 1 Participate to **training activities** designed in the Forward Capacity Building Plan: Identification and organization of training courses, webinars and/or infodays of interest (writing proposals, reporting and audits, ERC/MSCA calls, COST Actions, etc.)
- 2 Promote specific European call for ORs where high relevant research groups can be integrated within local consortiums in specific Marine Sciences & Technologies topics
- 3 Elaborate a **position paper** analysing the needs for the promotion of specific European call for ORs

### PERSPECTIVE OF LONG TERM COOPERATION

The development of an **Inter-regional platform** is a useful step to foster research collaboration with Experts from ORs, other European regions and Third Countries' Institutions with a common research domain : the marine realm.
